

April 10-12, 2011
Austin, TX

CALL FOR PAPERS

International Symposium on Performance Analysis of Systems and Software – ISPASS-2011

GENERAL CHAIR

David Brooks, *Harvard University*

PROGRAM CHAIR

Rajeev Balasubramonian, *University of Utah*

PROGRAM COMMITTEE

Tor Aamodt, *University of British Columbia*

Murali Annavaram, *USC*

Angelos Bilas, *University of Crete and FORTH*

Natalie Enright Jerger, *University of Toronto*

Babak Falsafi, *EPFL*

Rajiv Gupta, *UC Riverside*

Ravishankar Iyer, *Intel*

Aamer Jaleel, *Intel*

Brucek Khailany, *NVIDIA*

Tao Li, *University of Florida*

Gabriel Loh, *AMD/GaTech*

Niti Madan, *IBM*

Satish Narayanasamy, *University of Michigan*

Robert Oshana, *Freescall*

Mihir Pandya, *Freescall*

Nigel Paver, *ARM*

Karthick Rajamani, *IBM*

Suzanne Rivoire, *Sonoma State University*

Yanos Sazeides, *University of Cyprus*

Yan Solihin, *NCSU*

Viji Srinivasan, *IBM*

Bronis de Supinski, *LLNL*

Mithuna Thottethodi, *Purdue University*

Jun Yang, *University of Pittsburgh*

Zhao Zhang, *Iowa State University*

LOCAL ARRANGEMENTS CHAIR

Nadeem Malik, *IBM*

Nasr Ullah, *Freescall*

PUBLICITY CHAIR

Hyesoon Kim, *GaTech*

FINANCE CHAIR

Nadeem Malik, *IBM*

WEB CHAIR

Byeong Kil Lee, *UTSA*

PUBLICATIONS CHAIR

Mark Hempstead, *Drexel*

WORKSHOPS/TUTORIALS CHAIR

Benjamin Lee, *Duke*

REGISTRATION CHAIR

Andreas Gerstlauer, *UT-Austin*

SUBMISSION WEB CHAIR

Aniruddha Udipi, *University of Utah*

Sponsored by the IEEE
Computer Society's TCI, TCCA,
and TC-uARCH

The IEEE International Symposium on Performance Analysis of Systems and Software provides a forum for sharing advanced academic and industrial research work focused on performance analysis in the design of computer systems and software. Authors are invited to submit previously unpublished work for possible presentation at the conference. Papers are solicited in fields that include the following:

- Performance and power evaluation methodologies
 - Analytical modeling
 - Statistical approaches
 - Tracing and profiling tools
 - Simulation techniques
 - Hardware (e.g., FPGA) accelerated simulation
 - Hardware performance counter architectures
 - Techniques for modeling power, reliability, and other modern relevant metrics for computer systems
- Performance and power analysis
 - Performance and power metrics
 - Bottleneck identification and analysis
 - Visualization
- Performance and power analysis of commercial and experimental hardware
 - General-purpose microprocessors
 - Multi-threaded, multi-core and many-core architectures
 - Memory and storage systems
 - Accelerators and graphics processing units
 - Embedded and mobile systems
 - Enterprise systems and data centers
 - Supercomputers
 - Computer networks
- Performance and power analysis of emerging workloads and software
 - Software written in managed languages
 - Virtualization and consolidation workloads
 - Internet-sector workloads
 - Embedded, multimedia, games, telepresence
 - Bioinformatics, life sciences, security, biometrics
- Application and system code tuning and optimization
- Confirmations or refutations of important prior results

In addition to research papers, we also welcome tool papers. The conference is an ideal forum to publicize new tools to the community. Tool papers will be judged more so on their potentially wide impact and use than on their research contribution. Tools in any of the above fields of interest are eligible.

We also welcome papers that evaluate novel ideas and optimizations for computer systems. For serious consideration, such papers must provide insight, analysis, and conclusions that promote the community's understanding of the system itself and not just that of the specific optimization being considered.

A Best Paper award will be presented at the conference.

See <http://www.ispass.org> for submission details.

IMPORTANT DATES

Abstract due: Sep 17, 2010

Full submission: Sep 26, 2010 – **NO EXTENSION**

Rebuttal: Nov 22-30, 2010

Notification: Dec 10, 2010

Final paper due: Feb 24, 2011
